PROFILE

QA professional in active development, focused on manual testing, end-to-end automation, and API testing. No formal QA work experience yet, but with real-scope personal projects: a 275-test automated suite on a functional financial application, including two critical business-logic defects found and documented. Looking for my first full-time QA position.

EXPERIENCE

Alarm Monitoring Operator — Camtec S.A.

Dec 2023 – Present

Real-time monitoring of alarm events (manual and automatic triggers), severity-based prioritization, and incident response.

Alarm Monitoring Operator — Central 24 SRL

Dec 2022 – Aug 2023

Same responsibilities as current role.

PROJECTS

FolioTracker (repo: Registro-de-Operaciones) — Financial operations tracking app (stocks, crypto)

275-test suite: Vitest + Playwright + Testing Library, ephemeral database in Docker (PostgreSQL/Supabase), custom CI with GitHub Actions. Found and documented two critical defects that allowed creating money by bypassing interface validations.

Personal Portfolio — Astro + TypeScript, bilingual ES/EN

Test suite with Playwright (E2E, visual regression, WCAG AA accessibility with axe-core), CI/CD with GitHub Actions, deployed on Vercel.

API TESTING

Personal Postman collections against real APIs (Trello, ReqRes) — REST endpoint testing, request chaining, response validation.

TECHNICAL SKILLS

QA/Testing: Playwright, Jira, Zephyr Scale, Vitest, Testing Library, Postman, pytest, axe-core, Lighthouse CI

Languages: JavaScript, TypeScript, SQL, Python, HTML, CSS

Tools: Git, GitHub Actions, Docker, Vercel

EDUCATION

The Complete 2026 Software Testing Bootcamp — Udemy (completed)

ISTQB Foundation Level V4.0 — Udemy (course completed, exam pending)

Financial Markets Operator — UTN FRBA (coursework completed, not finished)
